

LISA KOHL

Sector Vice President
Global Supply Chain
Northrop Grumman Aerospace Systems

Lisa Kohl is sector vice president, Global Supply Chain, for Northrop Grumman Aerospace Systems, a premier provider of manned and unmanned aircraft, space systems, missile systems and advanced technologies critical to our nation's security.

Kohl is responsible for developing and maintaining a strong supply base for the broad set of products produced for Aerospace Systems' customers. The Global Supply Chain organization encompasses subcontracts, procurement, supplier assessment and quality, pricing and estimating, transportation, kitting, production support, and the business system architecture design and implementation.

Previously, Kohl was sector vice president, Global Supply Chain, at the former Integrated Systems sector. She also served as sector vice president of Operations, which included oversight for Production Operations, Quality Systems & Safety, Facilities & Real Estate, IT Solutions, Business Systems Architecture, and Global Supply Chain.

In her tenure with Northrop Grumman, Kohl has held a broad array of positions of increasing responsibility focusing on the communications marketplace for both ground-based and space-based applications, military and commercial. At Northrop Grumman's former Space Technology sector, she served as program manager of a multi-satellite defense program providing payload hardware and software; director of Wireless Telecommunications Products focusing on broadband wireless telecom; program director of a 400-person organization responsible for performance on more than 20 small to mid-sized contracts serving both military and commercial applications; and assistant project manager responsible for ground-based equipment and test systems.

From an infrastructure perspective, Kohl served as vice president of Six Sigma where she was responsible for the strategy and development of a tailored approach to implementing business transformation through process improvement. As vice president and CIO, she focused on restructuring the information infrastructure, consolidating computer support organizations, revamping the customer support model, and providing a more affordable methodology for delivering essential services to the enterprise. As director of the Ground Systems Center, she was chartered with ensuring superlative program performance in the areas of ground systems hardware, software, and test sets.

Kohl earned a bachelor's degree from Indiana State University and a master's degree from Purdue University. She is a graduate of the Northrop Grumman Business Leadership Program.

Northrop Grumman Corporation is a leading global security company whose 120,000 employees provide innovative systems, products, and solutions in aerospace, electronics, information systems, shipbuilding and technical services to government and commercial customers worldwide.
