

**We'd like to make something  
crystal clear.**

Northrop Grumman SYNOPTICS is the world's leading manufacturer of crystals for use in solid-state laser systems. Our recent transfer to the Space Technology sector of Northrop Grumman further strengthens our commitment to our customers, both commercial and military. With more than 30 years of experience and state-of-the-art growth equipment, we have the ability to markedly improve laser system performance and enhance beam quality. Our strong capacity in crystal growth, along with our strengths in precision fabrication and thin film deposition, make SYNOPTICS the obvious choice to meet your laser system demands. From medical applications to industrial applications to target illumination and military defense systems, solid-state laser crystals play a vital role. And no one understands this more clearly than Northrop Grumman SYNOPTICS.
