

#### FEATURES AND BENEFITS

#### FIBER COUPLED ARRAYS

- High Brightness
- 0.22 NA
- Passively Cooled
- Long Lifetime, High Reliability

#### OPTIONS AVAILABLE

- Red Aiming Beam (3mW - 20mW)
- Monitoring Photodiode
- Thermistor (NTC - PT100)
- Integrated TE Coolers

#### TECHNICAL SPECIFICATIONS

| Parameter                   | Specifications                            | Units |
|-----------------------------|---|-------|
| CW Power Output             | 10 to 45                                  | W     |
| Center Wavelength           | 808, 915, 940, 976, 980, 1064, 1340, 1532 | nm    |
| Center Wavelength Tolerance | 2 to 10                                   | nm    |
| Spectral Width (FWHM)       | 3 to 5                                    | nm    |
| Operating Temperature       | 15 to 35                                  | °C    |
| Wavelength Shift            | 0.3                                       | nm/°C |
| Fiber Connector             | SMA - 905                                 | —     |
| Fiber Core Diameter         | 100, 200, 400, 600, 800, 1000             | µm    |
| Fiber NA                    | 0.22                                      | —     |
| Built-In Thermistor         | NTC - 10kOhm -25 °C (Option: PT100)       | —     |
| Cooling                     | Conductive (through bottom surface)       | —     |
| Electro-Optical Efficiency  | Up to 45%                                 | —     |
| Storage Temperature         | -20 to +60                                | °C    |

#### FIBER CORE DIAMETER OPTIONS

| Models         | Output Power | Fiber 100 µm | Fiber 200 µm | Fiber 400 µm | Fiber 600 µm |

Copyright © 2008 Northrop Grumman Cutting Edge Optronics All Rights Reserved. Northrop Grumman Cutting Edge Optronics reserves the right to change product design and specifications at any time without notice. No license is granted by implication or otherwise under any patents or patent rights of Northrop Grumman Cutting Edge Optronics or others. No responsibility is assumed for the use of these products, nor for any infringement on the rights of others resulting from the use of these products. Information contained herein is believed to be reliable and accurate. Laser diode product components are intended for use in a user-devised end system. However, these products are capable of emitting Class IV radiation. Extreme care must be exercised during their operation. Only persons familiar with the appropriate safety precautions should operate a laser product. Directly viewing the laser beam or exposure to specular reflections must be avoided. Serious injury may result if any part of the body is exposed to the beam. The eye is extremely sensitive to the infrared radiation and therefore, proper eyewear must be worn at all times. Use of optical instruments with these products may increase eye hazard. Always wear proper eye protection when operating. This Product is covered by one or more of the following Patents: 5,898,211 | 5,985,684 | 5,913,108 | 6,310,900 | Other US and Foreign Patents Pending. Notes (1) These specifications apply for operation at 808nm. Other wavelengths available upon request. (2) A dry nitrogen environment should be provided by the user when storing and operating at temperatures below ambient dew point.

**⚠ DANGER ⚠**

**INVISIBLE LASER RADIATION**

\* AVOID EYE OR SKIN EXPOSURE TO DIRECT OR SCATTERED RADIATION \*

Diode laser  
SW & up, 790-1560nm  
CLASS IV
