- ▼ Our warfighters face more sophisticated, ever-evolving electronic threats. Northrop Grumman's Next Generation Jammer will detect and neutralize these threats to keep our forces out of harm's way. Our solution is more than just a pod replacement. It's an Airborne Electronic Attack system that is fully integrated with the mission aircraft. For more than 50 years Northrop Grumman has been the leader in integrating complete airborne electronic attack systems. Only this depth of knowledge, combined with fresh ideas from the brightest minds in industry, can deliver a system providing total spectrum dominance to the warfighter.
