

***THE VALUE OF  
SEEING THE  
BIG PICTURE  
BEFORE YOU MAKE  
BIG DECISIONS.***

NATO is acquiring an airborne ground surveillance capability to provide a clear picture of ground activities essential to both deployed forces and decision-makers. NATO AGS will be vital to the full range of Alliance missions — from force protection and counter-piracy to border security and humanitarian relief. Relying on Global Hawk's proven capabilities, NATO is working with Northrop Grumman and its transatlantic industrial team to provide a truly transatlantic solution, and the earliest possible capability to NATO forces.

***THE VALUE OF PERFORMANCE.***

***NORTHROP GRUMMAN***
