- ▼ **SPACE TRACKING AND SURVEILLANCE SYSTEM** Congratulations to the U.S. Missile Defense Agency (MDA) for completing early on-orbit tests of the Space Tracking and Surveillance System (STSS) demonstration satellites. The Northrop Grumman-built twin satellites with infrared sensors demonstrated the capabilities required for birth-to-death tracking of ballistic missiles. Northrop Grumman is proud of its role as STSS prime contractor and as an MDA partner, helping make the world a safer place.
